Measuring for U-Tube Bundle Replacement

In Shell & Still in Service

STOP: If you can access the unit's data tag (usually located here), no measurements are needed. Just retrieve this information:

National Board #:

Model #: ____

Year: _____

Serial #:

Manufacturer:

A. Overall Length:

Measure from where the head flange meets the tube sheet to the end of the shell

B. Flange Circumference: _____

Wrap garment tape or similar tool around the head flange to get circumference

C. Shell Circumference: (Optional)

If shell is covered in insulation, skip this step. Otherwise, wrap garment tape around the shell to get circumference.

- D. Weld Line to End of Shell:
- E. Tube Sheet Thickness:

Measure the distance between both flanges.

F. Tube Sheet to Lip of Flange:

Skip if measuring a bolted tube bundle. Otherwise, measure the distance from the top of the tube sheet to the lip of the flange

Skip the Following if Measuring a Boltless Tube Sheet:

G. Cross Bolt Center-to-Center:

If possible, measure from the center of one bolt to the center of the bolt directly opposite it on the flange.

- H. Adjacent Bolt Center-to-Center:

Name: _____

A. Overall Length:

Measure from where the head flange meets the tube sheet to the end of the tank.

B. Flange Circumference:

Wrap garment tape or similar tool around head flange.

C. Shell Circumference:

Wrap garment tape or similar tool around unit's neck.

D. Tube Sheet to Tank:

Measure from where the tube sheet meets the shell flange to the edge of the tank.

E. Tube Sheet Thickness:

Measure the distance between both flanges.

F. Tube Sheet to Lip of Flange:

Skip if measuring a full face tube bundle. Otherwise, measure the distance from the top of the tube sheet to the lip of the flange.

Skip the Following if Measuring a Boltless Tube Sheet:

G. Cross Bolt Center-to-Center:

If possible, measure from the center of one bolt to the center of the bolt directly opposite it on the flange.
